The remedy is to have the **City Council** of Auckland take the initiative in the matter. It can rise to the duties, which should consist of conducting or having conducted a thorough and complete investigation, and giving an examination and report, with shafts redressed and replaced, and the necessary repairs for access and ventilation. The cost of such a survey and report would be small in comparison to each of the various expenses and public inconvenience, and the results would be of benefit to the community, as well as to the residents, connected with the present system of disposal of the refuse.

It is not only proper interest on the matter, but a duty, that the City Council should find that they may pay back the money to the ratepayers, and the roads would be improved. The continued interruption of traffic by the forms a standing grievance, and it is not to be changed by the City Council, and it is not to be changed by the City Council, and it is not to be changed by the City Council.

The same with the electric lighting system.

April 24, FRANK GREENE
